Definitions

International Tourism Spend

International tourist spend is defined by holders of internationally issued cards who have NZ transactions in fewer than four months or fewer than fourteen days in a 12 month period.

Domestic Tourism Spend

Domestic tourism spend is defined by in-person card transactions made in the district by individuals who live outside the district and whose home district's largest urban centre is at least 40 km away.

Local Spenders

A transaction is defined as local spend when it occurs in an area where the cardholder regularly makes purchases or where their last known home location is recorded. This may also include spending by regular travellers and commuters to the region.

Median household income

This metric is inflation-adjusted and reflects the median combined income of households.

Employment rate

The percentage of the working age population that are employed (either full or part-time).

Years to save for a deposit

The number of years it would take to save for a 20% deposit on a property (based on the median property value), saving at an annual rate of 20% of median household income minus the annual median rent price. This assumes that house prices and income remain the same.

Purchasing affordability

Purchasing affordability is the percentage of annual median household income that would be spent on mortgage repayment (based on purchasing at the median house price with a 20% deposit over 30 years assuming a fixed interest rate of 4%).

Rental affordability

The percentage of annual median household income that is spent on rent (the higher the %, the less affordable renting is).

Deprivation Index

The deprivation index of the area is calculated using Dot's Dynamic Deprivation Index (DDI), where an index of 1 represents the least deprived areas and an index of 10 represents the most deprived.

Deprivation Score

The deprivation score is a calculation of the socio-economic deprivation of an area, where a higher score represents higher levels of deprivation.

Crime rate

Crime rate is defined as the number of victimisations over the last 12 months per 10,000 people.
